founder of the Parent Encouragement Program (PEP, Inc.)

**SAYS JAY TROBEC, PHD, CHIEF METEOROLOGIST,
KELO-TV IN SIOUX FALLS, SOUTH DAKOTA**

I love *that the weather affects everyone, and my forecasts help people plan their days.*

My biggest on-the-job challenge is *making "partly cloudy and 77 degrees" sound interesting—it's a pretty boring forecast for a Meteorologist!*

Perfect weather is *any type of weather that makes people talk about the weather.*

If I were a weather pattern I'd be *a jet stream—you can't see it or hear it, but it affects everything that happens below it.*

During severe weather, I'll work *fourteen hours straight on live TV without a break!*

If I weren't a Meteorologist, I'd be *a Teacher.*

- ①    Visit the library or the Internet to learn about hurricanes. Define their five categories and the system Meteorologists use to name them.
-  ②   Draw a picture of Hurricane [YOUR NAME HERE]. Identify your category, where you started, where you're headed, and how long you'll last. (Mom may say forever!)
- ②    Identify the day's high and low temperatures for three,

Meteorologist Jay has a PhD in atmospheric, environmental, and water resources from South Dakota State University. Before becoming a Meteorologist, he worked as a television newscaster and sportscaster. But it's meteorology that has taken him around the world—speaking at weather conferences in France, Spain, the Netherlands, Switzerland, and Slovenia.
